

**PB-FCF FIXED FLOW CONTROL VALVE, PRESSURE COMPENSATED**

**DESCRIPTION**

8 size, 3/4-16 thread, "Power" series, pressure compensated flow control valve.

**OPERATION**

The PB-FCF maintains a constant flow rate out of (1) regardless of load pressure changes in the circuit downstream of (1). The valve begins to respond to load changes when the flow through the valve creates a pressure differential across the control orifice, in excess of the spring load. Consult graph for regulation performance. Reverse flow (1) to (2) returns through the control orifice and is non-compensated.

**FEATURES**

- Hardened parts for long life.
- Industry common cavity.

**HYDRAULIC SYMBOL**

*Best stability version for high differential circuits.*
